A site that answers the phone.

Website, admin portal, AI intake and quoting, with a separately scoped shop scheduler.

WHAT GETS BUILT

A practical front office for the shop

Built around Warren Welding & Generators: in-shop and portable welding, truck and implement repair, DewEze and Deutz work, generators, parts and service. Give customers another way to reach you and keep inquiries organized alongside the work already coming by phone.

The website and your admin portal

A custom Business Pro website and private dashboard for incoming requests, customer details and lead status. Includes accessibility review, page-speed optimization and three revision rounds. The existing site provides the starting point for your review and final content.

An intake and quoting assistant

Answer routine questions, collect equipment and job details, prepare estimates using your pricing, and draft follow-ups when a lead goes quiet. The assistant drafts; you review and approve before anything goes to a customer.

The shop schedule, off the wall

A separate scheduling project for jobs, crews and dates in the admin portal. Phase 1 gives phones read-only calendar access. Staff notifications and two-way updates belong to Phase 2 and are not included in the Phase 1 estimate.

Same system. Two ways to pay.

The build costs $3,600 either way. Ongoing service costs $99 per month in both options.

THE MONEY / REVISED PAYMENT OPTIONS

Cost	Pay over 12 months	Buy the build outright
Build payment	$300/month for 12 months	$3,600 upfront
Ongoing service	$99/month	$99/month
Monthly payment, year one	**$399/month**	**$99/month**
Due at signing	$0	$3,600
First 12 months of service + build	**$4,788 total**	**$4,788 total**
From month 13	**$99/month**	**$99/month**
Source-code ownership	When build is fully paid	When build is fully paid

Monthly billing starts at launch. The installment option has a 12-month build-payment commitment. Outright purchase has no minimum term on ongoing service. Scheduling is separate.

Same ongoing service in either option

AI intake, FAQs and quote drafting; workflow automation for the agreed repetitive tasks; Google SEO and Business Profile upkeep; monthly content edits; hosting, SSL, backups and security patching; quarterly strategy calls and priority support.

Scheduling, priced separately.

The same scheduler estimate applies whichever website payment option you choose.

ESTIMATE / CONFIRMED AFTER SCOPING

Scheduling work	Separate charge
Scoping call 30 minutes reviewing how the shop assigns jobs and crews. Confirm requirements and a fixed Phase 1 price.	No charge
Phase 1: shared schedule Jobs, crews and dates in the admin portal. Subscribe from a phone calendar app; read-only on the phone.	**$2,000-$3,000** One-time estimate
Phase 2: notifications and two-way updates Staff alerts when jobs are added or moved, plus updates from the field such as marking jobs done.	**Not yet priced** Scoped after Phase 1

Custom work uses the neighbor rate of $125/hour, reduced from $150/hour. Phase 1 remains an estimate until scoping; the quoted range does not include Phase 2.

Combined first-year budget

Either payment option	Total
Website build + 12 months of service	$4,788
Plus Phase 1 scheduler	$2,000-$3,000
First-year total with Phase 1	**$6,788-$7,788**

Phase 2 is additional and excluded from this total. Scheduler payment timing is agreed during scoping.

From review to launch.

A four-week target for the website and assistant; scheduling follows its own agreed timeline.

HOW IT RUNS

WEEK 1

Content and pricing

Provide work photos, your service list and the pricing rules the quoting assistant should use.

WEEK 2

Site review and revisions

Review the existing site. Correct copy, photos and services to match how you describe your work.

WEEK 3

Assistant and admin walkthrough

Train the assistant on your services and pricing; walk the office team through the portal.

WEEK 4

Launch on your domain

Connect the domain, verify forms and launch. Monthly billing begins at launch.

AFTER LAUNCH

Scheduler build

Build the separately scoped scheduler at the fixed price agreed after the scoping call.

What I need from you

Photos of finished work; your service list and corrections; estimate pricing or rules; domain-registrar access or authorization to register a domain; and one decision-maker for revisions. Timing depends on receiving these inputs and completing your reviews.

Prepared by Derick Mayberry / Bodark for Warren Welding & Generators, 227 Apricot Lane, Berryville, AR 72616. Shop phone: (870) 423-2037.

The terms, plainly stated.

Revised payment structure replaces the pricing and ownership terms in the September 10 quote.

PAYMENT, OWNERSHIP & SERVICE

One build price. The neighbor build price is $3,600, reduced from $4,500 (20% off). Pay it upfront or in twelve $300 installments. There is no installment premium.

Monthly billing begins at launch. Installment buyers pay $399/month for the first twelve months: $300 toward the build and $99 for service. Outright buyers pay $3,600 upfront and $99/month from launch.

After the build is paid. Both options continue at $99/month for the same ongoing service, month-to-month. The twelve-month build commitment applies only to installment buyers.

Rate continuity. The $99 service rate holds while service continues without a break. Returning after cancellation is subject to the rate in effect then.

Ownership. You own your content and domain in both options. Source-code ownership transfers once the $3,600 build is paid in full, including after the final installment.

AI approval. The assistant drafts; you approve. No customer-facing message goes out unreviewed unless you later authorize that workflow.

Scheduling. Phase 1 is estimated at $2,000-$3,000 pending scoping. Phase 2 is unpriced and requires a separate agreement. Neither phase is included in the $4,788 base first-year total.

About the neighbor rate

You are friends, and I would appreciate permission to show the work in my portfolio, an honest testimonial and referrals to other shop owners. These are requests, not conditions of the price. The discount holds either way.

Originally issued September 10, 2026. Revised September 21, 2026. Valid until October 10, 2026.
